PROFESSIONAL EXPERIENCE

Software Developer

June 2021 - Present

[Everest Solution LLC](#)

- Successfully led the development of over 20+ mobile applications catering to a wide array of domains each app was meticulously tailored to meet the specific requirements of our esteemed clients ensuring their utmost satisfaction and addressing their unique business needs.
- Leveraged Git submodules for a shared code base significantly streamlining our workflow this approach halved the development time of our mobile applications enhancing efficiency and productivity across the team.
- Implemented MSSQL mirroring and replications for Report DBs segregating them according to their specific usage purposes and enhancing system efficiency by 40% through optimized performance and improved data management strategies.
- Leveraged Docker and Prometheus along with Bash scripting to enhance service monitoring and deployment processes, elevating operational efficiency and reliability.

Billing Engineer

January 2020 - November 2021

[Unitel LLC](#)

- Taking the lead in the development of the groundbreaking project named "Ger Duuren," a unique combination of LTE internet and Satellite digital television services tailored for subscribers without fiber optic connections, I created subscription plans on the core system and developed a CRM for managing these distinct services efficiently. This project led to increasing subscriber engagement by 35% and boosting revenue by 25% within the first year of implementation.
- Took responsibility for the development and enhancement of the billing CRM system, significantly elevating its performance to align with evolving business needs. This initiative resulted in a remarkable 30% increase in efficiency, underscored by improved speed and system responsiveness.
- Developed API microservices that facilitated seamless data sharing between different system components, optimizing overall functionality and contributing to a 45% improvement in system integration efficiency.
- Optimized and maintained Oracle SQL queries for billing calculations, significantly enhancing both the performance and accuracy of financial data processing.

Front-End Developer

August 2018 - January 2020

[Retoch LLC](#)

- Contributed to the end-to-end development of an eCommerce project, culminating in the successful launch of its mobile application on both the App Store and Play Store.
- Engineered captivating landing pages and dynamic banners, significantly elevating the app's visual aesthetics and simplifying the product ordering workflow.
- Developed a customizable Dashboard Portal for order management, streamlining order processing and resource allocation, which boosted overall productivity and operational efficiency.
